

EASY RIDER[®] CAR HARNESS

FOR THE PET OWNER WHO CARES

INSTRUCTIONS

1. With plastic buckle unfastened, open the harness and hold as illustrated.
2. Facing your dog, slip the entire harness over the dog's head.
3. Reach between the straps and pull the dog's legs through loops (R) and (L).
4. If necessary, adjust the neck (A) and girth (B) straps by moving the metal slides.
5. When a comfortable fit is established, fasten the plastic buckle to secure the harness.
6. Put the car seat belt through the harness loop (C) and fasten the seat belt buckle.

NOTE: *Back seat location is recommended.*

By following the instructions above, your pet will have a comfortable ride in a safe and secure position.

Most dogs accept the **Easy Rider Harness** very well. Some pets, however, need a little extra time to become accustomed to it. If this is the case with your dog, follow these simple steps:

- ★ Before riding in car, allow your dog to wear the **Easy Rider Harness** at home for a short time.
- ★ Repeat this several times until pet becomes familiar with harness and feels comfortable wearing it.
- ★ Secure your dog in the car using the seat belt (as illustrated) for a short ride.
- ★ Soon your dog will welcome the **Easy Rider Harness**, associating it with a car ride with you.

Important suggestions if you must leave your dog alone in a parked car:

Most pets will wait patiently and comfortably while restrained in the harness until you return. However, if your dog has a tendency to become restless or excited while alone in the car, please release the seat belt before you leave and refasten it upon your return...*before* you resume driving.

Be certain that your dog has proper ventilation while left alone in the car.

On hot days, the temperature inside a parked car can rise to dangerous levels in a very short time. In these conditions *your pet should never be left alone in your car - not even for a short period of time.*
